Accessories

Pocket Pad

A patient's medical record and other clinical data are viewable on demand throughout the hospital on the medical pocket pad.

Advantech Pocket Pad is specifically designed for hospital applications. It combines the best in a lightweight and flexible package to ensure patient safety. Build your intelligent hospital with Pocket Pad.

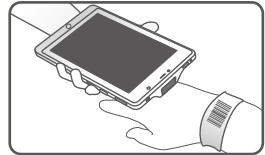

Medical Quality & Reliability

- Pocket Pad is protected from dust and water damage. It has an IP54-rating and has been drop-tested from 90cm to ensure reliable operation.
- A long lasting battery is important to get through a shift. The Pocket Pad's battery ensures at least 4 hours of uninterrupted operation.

Patient & Medication Safety

- Capture images on the spot for diagnosis, history, or insurance need.
- Identify, track, and trace patients throughout the hospital. Pocket Pad ensures the right patient receives the right treatment.

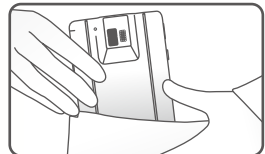

Flexible & Programmable

- Windows-based software is easy for integration and offers users a familiar interface.
- Data can be exchanged with ease between a number of hospital information systems and other smart devices.

Pocket-size Solution Fits in Your Hand

- Pocket Pad is slim and light, making it easy to carry throughout the day.
- It features HD resolution on an LCD screen for crystal clear images.
